1. NATURE OF OPERATIONS

Victoria Gold Corp. ("Victoria" or "the Company"), a British Columbia company, was incorporated in accordance with the Business Corporations Act (British Columbia) on September 21, 1981. The Company's common shares are listed on the TSX-V.

The Company is engaged in the acquisition, evaluation, exploration and development of mineral properties. To date, the Company has not realized any revenues from its properties and is considered to be an exploration and development stage company. The Company's registered office is located at 80 Richmond St. West, Suite 303, Toronto, Ontario, M5H 2A4, Canada.

The recoverability of the amounts shown for resource properties and related deferred costs is dependent upon the existence of economically recoverable mineral reserves, the ability of the Company to obtain the necessary financing and permits to complete the development, and upon future profitable production or proceeds from disposition of these assets.

These condensed consolidated interim financial statements have been prepared using IFRS applicable to a going concern, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of operations as they come due for the foreseeable future. The Company's future is currently dependent upon its ability to successfully complete additional financing arrangements, secure all necessary permits, its ability to fulfil its planned exploration and development programs and upon future profitable production from, or the proceeds from the disposition of, its mineral properties. The Company periodically seeks financing to continue the exploration and development of its resource properties and to meet its future administrative requirements. Although the Company has been successful in raising funds to date, there can be no assurances that the steps management is taking, and will continue to take, will be successful in future reporting periods.

At May 31, 2015, Victoria Gold Corp. ("Victoria" or "the Company") had a working capital surplus of \$10,538,336 (compared with a surplus of \$12,080,636 at February 28, 2015), reported a net loss of \$723,190 (2015 net loss - \$839,568) and accumulated deficit of \$39,549,073 (\$38,825,883 at February 28, 2015).

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies followed in the presentation of these condensed consolidated interim financial statements are consistent with those of the previous financial year,

4. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of these condensed consolidated interim financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. The condensed consolidated interim financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the consolidated financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and the revision affects both current and future periods.

In preparing these condensed consolidated interim financial statements, the significant judgments made by management in applying the group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements for the year ended February 28, 2015.

10. ASSET RETIREMENT OBLIGATIONS

Reclamation and closure costs have been estimated based on the Company's interpretation of current regulatory requirements and measured with the most reliable information available. Management's estimate is determined based on the net present value of estimated future cash expenditures for reclamation and closure activities. Reclamation and closure costs are capitalized into Resource properties dependent on the nature of the asset related to the obligation and amortized over the life of the related asset. Future changes to those regulations and standards, as well as changes resulting from operations may result in actual reclamation costs differing from the estimate.

The Company's asset retirement obligations arise from its obligations to undertake site reclamation and remediation in connection with the Santa Fe and Dublin Gulch properties. The estimated costs of reclamation are based on current regulatory requirements and the estimated reclamation costs at the reporting date using the following assumptions:

- a) total undiscounted amount of inflation adjusted future reclamation costs was determined to be \$795,439 for Dublin Gulch and \$2,166,992 for Santa Fe;
- b) weighted average risk-free interest rate at 1.1% and a long-term inflation rate of 2.0%; and
- c) expected timing of risk adjusted cash outflows required to settle the obligation will be incurred over the period through 2028 for Dublin Gulch and through 2016 for Santa Fe.

The following is an analysis of the Company's asset retirement obligation:

One-eighth of options granted under the plan vest immediately; a further one-eighth vest after each three month period thereafter, with the final one-quarter vesting eighteen months from the date of grant.
