### TEAGAN CARTWRIGHT

Since May 2022, **Teagan Cartwright** has worked for Victoria Gold at the Company's Eagle Gold Mine as an ADR Supervisor the site's Adsorption, Desorption and Recovery (ADR) plant, which recovers the gold from the ore.

Teagan's role involves overseeing all things related to the mine's Gold Recovery Plant (ADR) from safety, plant and refinery operations and troubleshooting, to the coordination of maintenance work and operator development. She also helps prepare the gold once poured for shipment.

"This role has been a great stepping stone for my career as I have hopes of one day working in upper management," says Teagan. "Working for Victoria Gold at the Eagle Gold Mine has been a great learning experience in managing personnel. I'm lucky to work with the team here and learn from them every day."

A typical day at site for Teagan begins before 5:30 am with a 5:55 am call with the night shift operators and a shift crossover meeting with the department superintendent, planners and supervisors. She is in her office in the plant by 7 am.

"I usually start with a walk around the Gold Recovery Plant to see if there are any changes from the previous day," continues Teagan. "If the night shift operators reported any issues, I immediately work to get those addressed by connecting with other related departments. I then complete my daily reporting and after that, my day varies depending on what we have on the go."

I routinely do checks around the plant throughout the day and check in with the operators." Teagan's day concludes by 6:45 pm with a crossover meeting with the night shift operators to summarize how the day went and to hand off any tasks to be completed. Adds Teagan, "After my shift, I go to the gym most evenings and in the summer, I try to get out on the site's walking trail as much as I can. On Friday nights, I also attend the site's 'Name That Tune' activity."

In May 2023, Teagan represented Victoria Gold at the CIM Conference held in Montreal, which brings together thousands in the mineral industry over three days of learning, knowledge sharing and professional development surrounding innovative mining best practices, technology and services.

"I'm a firm advocate of gender diversity within the mining industry and was lucky to represent Victoria Gold at the conference to showcase the unique operation we are running at the Eagle Gold Mine here in the Yukon," concludes Teagan.
